FULL-STACK CRAFT. AI-NATIVE MINDSET.

AV / 2025

PROFILE

Uruguayan Full-Stack developer specialized in **React, Next.js and React Native**, focused on **AI-native products** and scalable SaaS. **Current professional employment at Mental** (App Store & Google Play shipping; web and mobile platform). I have built and shipped +15 production projects, including systems with **agentic AI architecture**, payments, authentication and observability. Passionate about clean code, performance, and the details that turn a good product into an exceptional one.

PROFESSIONAL EXPERIENCE

PAID ROLE WITH A COMPANY — SHIPPING PRODUCTION PRODUCT.

Full-Stack Developer · Mental

06/2025 — Present

Development and maintenance of the personalized hypnosis mobile app (React Native / Expo), shipped to App Store and Google Play. Built the web platform (React Native Web / Next.js) with advanced audio player, offline downloads and subscriptions via RevenueCat. Integrated OneSignal, Sentry, i18next and JWT authentication. State with Zustand + TanStack Query. Continuous deployment on Vercel.

React Native Next.js TypeScript Expo RevenueCat OneSignal
Sentry Zustand TanStack Query JWT Vercel EAS

EDUCATION & STUDIES

ACADEMIC PROGRAMS AND CERTIFICATIONS. NOT PROFESSIONAL EMPLOYMENT AT THESE INSTITUTIONS.

Full-Stack Development (MERN) · Instituto BIOS

03/2024 — 01/2025

Intensive program: end-to-end MERN applications, REST APIs, PostgreSQL and MongoDB, Docker, Git and deployment. Coursework and graded projects.

Node.js Express React MongoDB PostgreSQL Docker Linux
Postman

Web development certifications · FreeCodeCamp

09/2023 — 01/2024

Self-paced curriculum with deployed full-stack projects, D3.js visualizations, Node/Express and SQL databases.

Digital skills for the workplace · Instituto BIOS

09/2024 — 01/2025

Cross-cutting course: Office 365, Google Workspace, Power BI and digital productivity in professional settings.

HIGHLIGHTS

+15 PRODUCTION PROJECTS

2 APPS SHIPPED

+10 TECHNICAL CERTIFICATIONS

TECH STACK

FRONTEND

React, Next.js, React Native, TypeScript, Tailwind CSS, shadcn/ui, Vite

BACKEND

Node.js, Express, Prisma ORM, JWT, NextAuth.js, REST APIs

DATABASES

PostgreSQL, MongoDB, Supabase (RLS)

AI & LLMS

OpenAI API (GPT-4), ElevenLabs, Cursor AI, prompt engineering

MOBILE

Expo, EAS, App Store Connect, Google Play Console, TestFlight, Reanimated

FEATURED PROJECTS

WhatsApp AI SaaS

whatsapp-ai-saas ↗

SaaS to automate WhatsApp Business conversations using an **AI agent with tools** — not a fixed workflow. Key distinction: a *workflow* follows predetermined steps A→B→C; an *agent* autonomously decides which tools to call, in what order, and how many times, based on message context. The agent runs an **agentic loop** (up to 10 iterations) with three real tools: queries customer history and bookings from PostgreSQL, searches the business knowledge base, and schedules deferred follow-up messages. Dashboard with NextAuth.js, analytics, business hours and multi-business support.

Stack: Next.js · TypeScript · PostgreSQL · Prisma · OpenAI API (tool use) · NextAuth · Vercel

Arbix — E-commerce Arbitrage Platform

arbibuy.vercel.app ↗

SaaS to detect arbitrage opportunities between Alibaba and Amazon FBA. Fault-tolerant scrapers across 5 platforms, multi-marketplace calculator (US/ES/MX/JP/DE/UK/FR/IT/BR) with fees, alerts and bulk scans. Auth with Supabase + RLS, 4 cron jobs on Vercel.

Stack: Next.js · TypeScript · Supabase · Recharts · Cheerio · Google Trends · Vercel

Mental — Cross-platform mobile app

App Store · Play Store ↗

Personalized hypnosis app published on App Store and Google Play. Animations with Reanimated, responsive UI, ElevenLabs integration for generative audio, MongoDB API management.

Stack: React Native · Expo · TypeScript · MongoDB · ElevenLabs · EAS · TestFlight

Mental Web Platform

mental-web ↗

Web version with advanced audio player, background playback and offline downloads (Service Workers). Subscriptions with RevenueCat, push notifications via OneSignal, monitoring with Sentry, full i18n.

Stack: React Native Web · Expo · TypeScript · Zustand · TanStack Query · Sentry

DEVOPS & OBSERVABILITY

Docker, Vercel, Render, Git/GitHub, Sentry, OneSignal
