AI product engineer with **Spanish (EU) and Uruguayan citizenship**. Three years building and shipping product: in **turnia**, an **agent** with twelve tools, five of them writing to a real calendar, and my own **eval suite** against regressions; at **Mental**, an app live on the App Store and Google Play that grew to **60,000 users**, with real billing across **five payment providers**. Available to start in Spain: on-site, hybrid or remote.

Freelance, for an external client. [IN DEVELOPMENT](#) · [STORE RELEASE PENDING](#)

SELECTED SIDE PROJECTS

WEB · SAAS **turnia** [turniagenda.com](#) 2025 — 2026 · live

Multi-tenant SaaS with a real **tool-using AI agent** instead of a fixed workflow: **12 tools, 5 of them writing**, so the agent books, reschedules and cancels against the live calendar. Business rules — booking ownership, cancellation window, deposit policy — are enforced **in the tool layer, not in the prompt**. **HMAC-SHA256** webhooks, Redis idempotency, **failover across 3 LLM providers**, and a custom **11-case, 26-assertion eval suite** to catch agent regressions.
Next.js · tRPC · Prisma · PostgreSQL · Groq / Gemini / OpenAI · MercadoPago + Paddle + Stripe · Upstash · Vitest

WEB **Arbix** [getarbix.com](#) 2026 · live

Arbitrage scanner between Alibaba and Amazon FBA. **Fault-tolerant scrapers across 5 platforms** cached on Redis, a fee calculator covering **9 marketplaces**, 4 scheduled jobs and AI image generation for listings.
Next.js · Supabase + RLS · Upstash Redis · Cheerio · Replicate · Vercel Cron
